Book: Charlotte McConaghy, *Migrations*

*Please note that this film might be upsetting to some. If possible, watch the trailer before viewing.

Josey Sharrad, Wildlife Campaign Manager – Program, Oceania
Bear, USC X IFAW koala detection dog

Fun Fact about Josey: Josey had the honour of going out in the field with Bear a number of times. Every time he locates a koala it often took the humans such a long time to spot it in the tree that he often seemed impatient with them.

Movie: Bear-Koala Hero (2020)
“The ‘dogumentary’ follows IFAW x UniSC koala detection dog Bear and his team on a mission to search for survivors following Australia’s Black Summer Bushfires.

Bear was our secret weapon in the wake of these devastating fires. Koalas are notoriously difficult to spot with the human eye, but Bear can smell what we can’t see. Trained on the scent of their fur, Bear can locate koalas that may be sick and injured over huge distances.

He found over 100 koalas, many of which were rescued, rehabilitated and released back into the wild where they belong.”
